

SUNRISE BOULEVARD INTERCHANGE

BROWARD COUNTY

Florida's Turnpike Enterprise

PROJECT NAME	Sunrise Boulevard Interchange Improvements
FP ID No.	406103-1
COUNTY	Broward
CONSTRUCTION YEAR	FY 2013
TOTAL COST	\$31 million

PROJECT DESCRIPTION

The Sunrise Boulevard interchange provides one of the primary commuter route links to Florida's Turnpike System for the Ft. Lauderdale metropolitan area. Due to the traffic in the area, the Sunrise Boulevard interchange operates at a poor level of service during peak hours. The Turnpike is conducting a Project Development and Environment Study that will evaluate interchange modifications to improve the operating conditions of the Turnpike mainline and the Sunrise Boulevard interchange. Included in the alternatives to be analyzed is the no-build scenario, which normally means no improvements, but in this case would include the replacement of the Sunrise Boulevard bridge over the Turnpike and the interchange ramp bridge over the Turnpike just north of Sunrise Boulevard. The design is scheduled to begin August 2008.
