

RFRP # 11/12-009

Use of High Intensity Reflective Sheeting in lieu of External Lighting of Overhead Roadway Signs

### **Technical Questions and Responses**

Question: Will FDOT's sign inventory be available to researchers to study for this research project?

Response: Yes, FDOT's overhead sign inventory consists of location, type of structure (span type, monotube, cantilever, butterfly, etc.), it also includes structure inspection information. It does not include information about type of sign, type of lighting, etc.

Question: Will FDOT provide necessary material such as signs and the high intensity reflective sheeting for testing if needed?

Response: No.

Question: Should the materials used for testing and associated costs be included in the proposed project budget if the sign testing is proposed?

Response: Yes.
